

Course Lifecycle

* Where a course review and/or re-approval cannot be completed before the approval expires, the relevant Executive Dean (or delegate) must apply for an extension of the current approval to Academic Board, with a timeline for completion of the review and/or re-approval. The extension request must outline the reasons why the review and/or re-approval has not been completed. Academic Board can approve an extension up to 12 months OR suspend the course until completion of the course review and re-approval is granted.
